

MDC Silas Deane Highway Hydraulic Capacity Improvements & Goff Brook Overflow Project

Rocky Hill & Wethersfield, CT

Client

Malcolm Pirnie, Inc.

Completed

2011

Description

Zuvic Carr provided professional land surveying services to Malcolm Pirnie, Inc. for the Metropolitan District (MDC) Silas Deane Highway Capacity Improvements Project.

Professional services included field survey of more than sixty manholes and five service connections in two municipalities.

Elevations were obtained to A-2 accuracy for manhole frames, iron pin benchmarks, foundation tops, and finished floor elevations for selected locations on the Silas Deane Highway (State Route 99), Hewitt Street, Executive Square, and at the Rocky Hill Water Pollution Control Facility site. Zuvic Carr tabulated and published these survey elevation data in a report to Malcolm Pirnie.
